CORPORATE PROFILE

ABOUT US

Biosec Solutions is an Identity Management consultancy with core biometrics, smart card, token based enterprise architecture strengths with cumulative experience of over 30 years. Our goal is to provide high technology systems and solutions to solve challenges paramount in the African space.

OUR SERVICES

OUR SERVICES

Identity Management Systems

Our highly knowledgeable professionals offer advice on large scale biometric programmes and the intricacies of sustainable biometric roll outs; data capturing, identity management, system security and verification services. We also specialize in card based identity based on ISO 7816 specifications.

Management of Information Systems

With our innovative approach, we offer unique solutions to managing your business processes through IT based platforms with a focus on streamlining costs, market expansion and maximization of outputs.

Forensic Analysis

Our consultants are internationally trained subject matter experts in biometrics and document analysis, and who have successfully executed various government projects both locally and internationally.

Enterprise Architecture

For every technology based information system introduced, we offer advice on how to restructure your organization to maximize the efficiency of the new technology. Our core strength is working with you to ensure that your new systems are compliant with regulations and global standards of use.

PKI

We mitigate unacceptable security risks and resources. We will walk you down the PKI security “rabbit hole.”

Training and Certification

We are a member of the Biometrics Institute – the independent, impartial and international organisation that promotes the responsible use of biometrics and industry best practices.

Mobile Application Development

From opening up channels to interact with your clients, to solidifying your brand, we have a team of expert mobile developers leveraging their skills to delivering your requirements.

Person Authentication Systems

We have extended our knowledge of smart card technology, access control systems, and biometric authentication devices to render lasting and scalable solutions to the needs of various private and government organizations.

OUR PROJECTS

Police Biometric Case Management System

Biosec is working with the Nigerian Police Force to digitize its operations with a view to enhancing its service delivery. The upgrades are aimed at unifying the Nigerian Police database through a digital case management solution, which infuses biometric technology in its core.

This enables the Nigerian Police force enrol, identify, and verify individuals, suspects, and persons of interest through a robust and secure biometric database, thereby, eradicating the challenges of the traditional police systems.

NIMC e-ID Data Preparation

Our solution does eID data preparation for the Nigerian National eID card and facilitates the chip and card body personalization of biometrics (fingerprint, face, iris), demographics, meta data, and ePKI data.

NIMC ABIS Support and Maintenance

We pride ourselves as the local technology partners of the NIMC Automated Biometric Identification System (ABIS). We ensure that the national identity adjudicator is highly available and accurate in ensuring uniqueness of identity in Nigeria.

NAPTIP Biometric Case Management System (ARMS)

Biosec Solutions was charged with the design and deployment of a robust biometric case management system that allows registration, verification, and management of crimes and cases for the National Agency for the Prohibition of Trafficking in Persons.

NIMC Diaspora Enrolment

Biosec Solutions is a pioneer NIMC accredited partner in the registration of Nigerians in Diaspora into the National Identity Database / System. Our strategic partnership with Nigerians In Diaspora Organization (NIDO), the largest umbrella diaspora organisation recognised by Nigerian law, ensures that Nigerians the world over have a chance to gain a National Identity Number (NIN)

OUR SOLUTIONS

v-ID™

A three-component software that provides virtual identity services for users. It provides a highly secure visual representation of the National eID card for easy verification on both mobile and web-based platforms.

SMASHAUDIO™

SmashAudio is a free mobile audio app, It provides users with both online and offline audio services, as well as a freely customizable user experience.

OUR SOLUTIONS

IMS™

Inventory Management System is a web-based management application designed to assist an organization in managing its inventory. It serves the function of proper tracking and management of company stock.

DORIS™

A document management and monitoring software built to suit the organizational needs of our clients to share documents and monitor document release dates, changes and versions.

PRS™

A project management software tool designed to manage and monitor company projects regardless of the size of the company.

BOARD AND MANAGEMENT
